Art Unit: 1616

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-3, 5-10, 12, 13, 15-18, 33 and 34 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 and claims 1-27 of U.S. Patent No. 5,800,832 and 6,159,498 respectively. Although the conflicting claims are not identical, they are not patentably distinct from each other because the instant claims encompass the scope of the patented claims with respect to polymers in the first layer.

Applicants argue that the instant claims are directed to water-erodible rather than water-soluble devices. However, it would be obvious to one of ordinary skill to add a well-known water-swelling polymer such as a low-substituted hydroxypropyl cellulose to the claimed water-soluble compositions cited above to achieve the beneficial effect of a water-erodible composition (See Takayanagi et al, US 4,765,983, column 3 lines 3-5).

No claims allowed.
